Profile Summary

Software Engineer Intern with hands-on experience in backend engineering, building scalable microservices and production-grade REST APIs using FastAPI and Node.js. Strong foundation in Data Structures, Algorithms, and Object-Oriented Programming, with practical experience in PostgreSQL, MongoDB, Redis caching, and system performance optimization. Proven ability to debug complex production issues, design reliable backend architectures, and collaborate across teams to deliver scalable, maintainable solutions.

Experience

CloudifyJob

December 2025 – March 2026

Software Engineer Intern

Bengaluru, Karnataka

- Developed **FastAPI-based microservices** behind a centralized **API gateway** to enable scalable inter-service communication and improve overall system reliability.
- Integrated **JWT-based authentication** and applied **Redis caching** to reduce redundant database queries and improve API response times by **30%**.
- Architected secure **RESTful APIs** with robust request validation, structured error handling, and standardized **HTTP responses** to ensure consistent and stable backend behavior.
- Engineered scalable **React interfaces** using functional components, Context API, and custom hooks to promote reusable logic and predictable lifecycle management.
- Optimized frontend performance by minimizing unnecessary re-renders through memoization, efficient state handling, and hook refinements, achieving a **45%** faster load time.

Navodita Infotech

September 2025 – October 2025

Full-Stack Development Intern

Bengaluru, Karnataka

- Designed a role-based, task-oriented full-stack application using **React**, **Node.js**, **Express**, and **MongoDB**, supporting **3+ user roles** with controlled dashboard access.
- Implemented **JWT-secured REST APIs** to handle task and role operations, enforcing authorization rules and ensuring reliable request-response behavior.
- Defined structured **MongoDB schemas** and data models for users, roles, and tasks to ensure consistent data storage and efficient querying.

Education

Jss Academy of Technical Education

December 2022 – 2026

BE in Computer Science Engineering (CGPA: 8.4/10.0)

Bengaluru, Karnataka

Technical Skills

Languages: C++, JavaScript, TypeScript, Python, Java, C, SQL, HTML/CSS

Frontend: React, Next.js, Redux, Context API, Material UI, Tailwind CSS

Backend: Node.js, Express, FastAPI, REST APIs, Microservices, Socket.IO

Databases & Clouds: PostgreSQL, MongoDB, Redis, Firebase, Appwrite, AWS

Tools & Platforms: Git, GitHub, Docker, Postman, VSCode, Jira, Vercel

Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, OOP

Projects

CodeSage AI | *React, Node.js, Google Gemini API*

ai-code-review

- Architected a real-time **AI-powered** code review platform using React, Node.js, and Google Gemini API, to support multi-language code analysis and optimization feedback.
- Introduced AI-driven maintainability and performance insights with a syntax-highlighted, side-by-side review interface, improving readability and reducing code errors by over **30%** during testing.

AI Resume Analyzer | *React, Puter.js, Zustand*

ai-resume-analyzer

- Engineered a full-stack **AI-powered** resume optimization platform using React, Puter.js, and Zustand, supporting secure authentication, PDF resume uploads, and job-specific analysis.
- Integrated **AI-driven** scoring and structured feedback across ATS compliance, content, tone, structure, and skills, reducing resume analysis time by **40%**.

ChatApp | *Node.js, Express.js, Socket.IO, MongoDB, JWT, Cloudinary*

Live Demo | GitHub

- Deployed a **full-stack real-time chat application** with secure JWT-based authentication, one-to-one messaging, persistent chat history, and instant communication using Socket.IO and MongoDB.
- Implemented image and file sharing with Cloudinary and Multer, secured user credentials using bcrypt.js, and developed scalable REST APIs for authentication and messaging workflows.
