PROFESSIONAL SUMMARY

Software Engineer with enterprise banking development experience on the **Finacle platform at EdgeVerve Systems**, working with Java, Spring Boot, Angular, Android, JSP, JSON, and SQL. Experienced in application design, object-oriented development, software development, testing, debugging, integration validation, deployment, code reviews, Agile iterations, user stories, and technical documentation. Strong foundation in data structures and algorithms, RESTful APIs, relational and NoSQL databases, multi-layer application development, and software engineering practices, with hands-on fintech experience building and deploying a payment reconciliation platform.

PROFESSIONAL EXPERIENCE

Software Developer — EdgeVerve Systems (Finacle Platform), Bangalore, India 2025 – Present

- Designed, developed, tested, debugged, and deployed end-to-end enterprise banking features based on user stories and business requirements, contributing across the software development lifecycle.
- Developed multi-layer application workflows across **Android client components, JSP backend components, JSON configurations, transformer files, event customizations, and SQL/database changes**.
- Implemented and enhanced **Recurring Payments, Mobile Payments, Pay & Scan, Transaction History, and View Authorization** capabilities for Bank Muscat, supporting enterprise banking workflows.
- Integrated client-side, backend, configuration, and database components to deliver complete application functionality across enterprise banking workflows.
- Performed **SQL/database operations**, validated application data and records, and investigated database-related issues across relational data workflows.
- Debugged and resolved issues across client, backend, configuration, and database layers; performed **end-to-end and integration validation** before feature deployment.
- Collaborated with developers, QA engineers, product teams, and stakeholders during **Agile iterations** to clarify user stories, resolve technical issues, and align software functionality with business requirements.
- Participated in **code reviews, continuous integration, testing, technical discussions, and technical documentation**, following software engineering principles and coding best practices.

EDUCATION

Bachelor of Technology (Computer Science & Engineering) — BVC College of Engineering | 2021–2025 | CGPA: 8.13

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python (Basic)

Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Object-Oriented Design, Software Engineering Principles, Application Design, API Design, Debugging, Multi-Layer Application Design, System Design Basics

Backend & APIs: Spring Boot, RESTful APIs, JSP, Node.js, Express.js

Frontend: Angular, React, Android, HTML, CSS, Bootstrap

Databases: SQL, MySQL, MongoDB, TiDB, Relational Databases, NoSQL Databases

Development & DevOps: Git, GitHub, AWS, Docker, Kubernetes, Continuous Integration, Vercel, Render

Engineering Practices: Agile Development, User Stories, Iterations, Code Reviews, Software Development Lifecycle, End-to-End Testing, Integration Validation, Technical Documentation, Coding Best Practices, Cross-Functional Collaboration

PROJECTS

Payment Reconciliation Platform — React, Spring Boot, TiDB [Live Demo]

- Built and deployed a full-stack fintech payment reconciliation platform using React, Spring Boot, and TiDB to manage payment transactions and reconcile transaction records against settlement data.
- Designed layered REST APIs and separated transaction, settlement, and reconciliation components, implementing data integrity, duplicate prevention, reconciliation history, and frontend-backend integration.
- Implemented reconciliation workflows to identify **Matched, Amount Mismatch, and Missing Settlement** outcomes and provide transaction-status visibility through a dashboard.

Flight Booking System — Java, Spring Boot, TiDB [Live Demo]

- Built a Spring Boot flight booking application with backend APIs and a deployed web interface for booking workflow management.

Foodie Website — MERN Stack [Live Demo]

- Developed a full-stack food ordering platform using MongoDB, Express.js, React, and Node.js with menu browsing, ordering, checkout, and order management.

CERTIFICATIONS & ACHIEVEMENTS

Certifications: Introduction to Database Systems (NPTEL); Programming in Java (NPTEL); SQL Basic, Java Basic, JavaScript Basic (HackerRank).

Problem Solving: 310+ LeetCode problems; 120+ GeeksforGeeks problems.
